ABOUT

I've had an interest in coding since junior high, this led me to pursue a Computer Science degree and consequently tutors others in web development. I recently completed a full-stack bootcamp where I built and deployed real-world apps using modern tech like React and Node.js. This coupled with hands-on experience at UserTesting and a strong foundation in collaborative workflows, makes me ready to start a career in software development.

SKILLS

- JavaScript: React, Nodejs, npm
- CSS: SCSS, Tailwind, BEM
- Git
- Build tools and generators: Astro, Vite

EXPERIENCE

Technative Digital - Trainee Junior Developer

Jan 2025 - Apr 2025

- Technative is an intensive bootcamp focused on practical, industry-relevant web development skills, there I:
 - Built front-end and full-stack apps using HTML, CSS, **Tailwind CSS**, **JavaScript**, **React** (with Redux), and Node.js.
 - Developed a Playlist Management Web App featuring RESTful APIs, Supabase for database and JWT authentication, and full deployment via Render and Netlify.
 - Worked in weekly sprints with daily stand-ups, applying agile methodologies and team collaboration practices.

- Used **Git** (short-lived branching), pull requests, and Trello for effective version control and task management.
- Practiced structured problem-solving, code reviews, and continuous improvement through peer collaboration and feedback cycles.

USERTESTING - Technical Intern

Jun 2023 - Sep 2023

- Developed automated scripts, using Jira and Scriptrunner, to automate the validation of syntax errors on issue labels in Jira
 - Developed an automated script to automatically assign testers, in a round-robin rotation, to different tasks in **Jira**
 - Worked in sprints as part of a **SCRUM team** and closely communicated with other technical teams to meet the requirements for the automation scripts
 - Quality tested said automation scripts to make sure they run efficiently time-wise and resource-wise

Titanium Tutors - Online Tutor

Sep 2021 - Present

- I tutored clients on the basics of HTML,CSS and **JavaScript**, guiding them in implementing simple websites.
 - I improved the coding efficiency of my client through targeted sessions by providing actionable tips.
 - I assigned personalized homework after key sessions, so the client could retain and put into practice what they had learned
 - I maintained flexibility in communication, offering support even outside booked sessions by reviewing code snippets or answering questions.
 - I deepened my understanding of foundational knowledge, enabling me to tackle more complex concepts.

EDUCATION

Strathclyde University | BSc Hons Computer Science | Glasgow, UK | June 2023 | Grade: 2.1

Springburn Academy | Scottish Advanced Highers | Glasgow, UK | August 2020

- Mathematics (A)
- Computer Science (A)
